

## Clinitrend<sup>®</sup> Product Data Sheet

**Product Description:** L320 Latex Free Forehead Moving Line Temperature Monitor

**Standard Range:** 84-106°F / 29-41°C

**Construction:**

**Adhesive Tape** Adhesive: Acrylic copolymer pressure sensitive adhesive, thickness 37 $\mu$  each side of carrier  
Carrier: Non-woven tissue, thickness 33 $\mu$   
Release Liner: Fully bleached, thickness 178 $\mu$   
Operating temp: -1 to 82°C (continuous use)

**Covering Film** Polyester

**Color Change Material** Nontoxic mixture of liquid crystal esters

**Accuracy**  $\pm 1.00^\circ\text{F}$  /  $0.6^\circ\text{C}$

**Shelf Life** 12 months from invoice date when stored at room temperature & humidity  
(i.e. 21°C (70°F) & 50% relative humidity)

**Application Data:** Peel temperature-indicating label from backing paper. Apply to forehead. Reversible analog line moves along the scale to show detailed temperature readings in °F and °C.

**Function:** Continuous display of temperature, as indicated by a bright line, of anesthetized patients. Core adjusted with 3.5°F / 2°C offset.

**Use:** Ideal for use in Pre-Op, Surgery, PACU
